Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See t 3 and 4.
[11] Farms classified by type. See tables 3 and 4.

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr.1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

**Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr.1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

* Not available.
** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures excluds land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures includs land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures excluds automobiles; the 1940 figures includs automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figures not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

*Not available.
**Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures excluds land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures excluds automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

* Not available.
** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

ADVANCE FIGURES: HENDERSON COUNTY, ILLINOIS

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite race.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

* Not available.
** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, draining, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Avsilable data not comparsble.
[1] 1945 figures include land in menaged ferms classified on bssis of whether owned or rented by the employsr; 1940 figures sxclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figurss include land used only for pasture which has been plowed within 7 yeers. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 yeers prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negross, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr.1, 1940, the figure includes only operators rsporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Availeble data not compareble.

[1] 1945 figures include land in managed ferms classified on besie of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly compareble with those for 1945. The 1945 figures include lend used only for pasture which has been plowed within 7 years. The 1940 figuree include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 yeers prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, end other nonwhite races.

[6] Detail will not edd to total ferms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with thet for 1945. For the 1945 Census, taken es of Jan. 1, 1945, the figure includes ell operators reporting 1944 or 1945 ae year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-eurfeced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not clessified by type. See tables 3 and 4.

[10] Not clessified either by total velue of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. Sse tables 3 and 4.

[12] Irish end sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

ADVANCE FIGURES: LAWRENCE COUNTY, ILLINOIS

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures excluded automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

AGRICULTURE

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

ADVANCE FIGURES: MASSAC COUNTY, ILLINOIS

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

* Not available.
** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr.1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

**Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

*Not available.
**Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

* Not available.

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr.1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr.1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or sand roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

**Available date not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

* Not available.
** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

**Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comperable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr.1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

[1] 1945 figuras include land in managed farms classified on basis of whathar owned or rented by the amployar; 1940 figures axclude land in managed farms.
[2] In 1944 snd in 1939.
[3] Tha 1940 figures sre not strictly comparable with those for 1945. The 1945 figures includa lend used only for pasture which has been plowed within 7 yeere. The 1940 figures include land pastured which could have been plowed and used for crops without edditional clearing, drainage, or irrigation. This land may not have baan plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include sutomobiles.
[5] White includes Maxicans; nonwhite includes Nagroes, Indiens, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm oparators did not report residence.
[7] 1940 figure not strictly comparsbla with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Cansus, taken as of Apr.1, 1940, tha figure includas only oparatore reporting 1940 as year they began operations.
[8] Farms located on hard-surfacad, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. Sae tables 3 and 4.
[10] Not classifiad either by total valua of farm products or by type. Sae tables 3 snd 4.
[11] Farms classifiad by typa. Sea tables 3 and 4.
[12] Irish snd sweet potatoas includad with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

* Not available.

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

**Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

*Not available.
**Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

**Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr.1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

* Not available.

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

**Available data not comparable.

[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.

[2] In 1944 and in 1939.

[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.

[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.

[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.

[6] Detail will not add to total farms since some farm operators did not report residence.

[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.

[8] Farms located on hard-surfaced, gravel, shell, or shale roads.

[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.

[10] Not classified either by total value of farm products or by type. See tables 3 and 4.

[11] Farms classified by type. See tables 3 and 4.

[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available date not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, 1 other nonwhite race.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

** Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed, and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on herd-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."

Farms, Farm Characteristics, and Value of Farm Products: Censuses of 1945 and 1940

Announcing advance results of the United States Census of Agriculture, 1945, an earlier report contained statistics on number of farms, farm acreage, specified classes of livestock, and specified crops harvested. As in the earlier report, the figures in this report are preliminary and therefore are subject to correction. Statistics for States and for the United States will be issued later.

*Not available.
**Available data not comparable.
[1] 1945 figures include land in managed farms classified on basis of whether owned or rented by the employer; 1940 figures exclude land in managed farms.
[2] In 1944 and in 1939.
[3] The 1940 figures are not strictly comparable with those for 1945. The 1945 figures include land used only for pasture which has been plowed within 7 years. The 1940 figures include land pastured which could have been plowed and used for crops without additional clearing, drainage, or irrigation. This land may not have been plowed within 7 years prior to 1940.
[4] The 1945 figures exclude automobiles; the 1940 figures include automobiles.
[5] White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and other nonwhite races.
[6] Detail will not add to total farms since some farm operators did not report residence.
[7] 1940 figure not strictly comparable with that for 1945. For the 1945 Census, taken as of Jan. 1, 1945, the figure includes all operators reporting 1944 or 1945 as year they began operations; for the 1940 Census, taken as of Apr. 1, 1940, the figure includes only operators reporting 1940 as year they began operations.
[8] Farms located on hard-surfaced, gravel, shell, or shale roads.
[9] Classified by total value of farm products, but not classified by type. See tables 3 and 4.
[10] Not classified either by total value of farm products or by type. See tables 3 and 4.
[11] Farms classified by type. See tables 3 and 4.
[12] Irish and sweet potatoes included with "All other crops," not with "Vegetables."
